Description

Whether you're a child or an adult, your health is a priority at Gila Valley Clinic. Our pediatricians, family physicians, nurse practitioners, physician assistants, and licensed counselors specialize in physical, mental, and social health at any age. As well as our family physicians practice obstetrics and gynecology. Our doctors are experts in their fields, teaching other doctors while keeping us current on the latest trends in medicine. We treat the whole family—babies, adults, pregnant women, and geriatrics—and provide care when they are hospitalized. In addition to being trusted by the Safford, AZ, community for over 40 years, we have received awards from numerous insurance companies for being one of the best practices in town
